DETAILED ACTION

Terminal Disclaimer

1. The terminal disclaimer filed on 10/20/05 disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date of US patent 6314105 has been reviewed and is accepted. The terminal disclaimer has been recorded.

Allowable Subject Matter

1. Claims 1-25 allowed.
2. The following is an examiner's statement of reasons for allowance: Regarding claims 1 and 13, the present invention is directed to a communication device for alternating routing the data packets having a bit rate greater than a predetermined value between a node and next hop router. Each independent claim identifies the uniquely distinct features "measuring the bit rate of data packet which is transmitting on a permanent transit path (PVC); if the measured bit is greater than a predetermined value, then creating a temporary transit path (SVC) between the node and next hop router for rerouting these data packets within a structure of the claims. The closest prior art, Callon (USP 5854899) discloses a method and apparatus for receiving/transmitting the data packets via existing feasible and efficient virtual connection (PVC or SVC); if the existing virtual connection is congested, then establishing a new virtual connection (PVC or SVC) to transmit the data packets, either singularly or in combination, fail to anticipate or render to be obvious..

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue

fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
